

SecureTech AV Designs

SecureTech AV Designs

Audio-Visual Consulting & Smart Technology Integration

About SecureTech AV Designs

SecureTech AV Designs is an AV & Technology Systems Integrator delivering AV, lighting, acoustics and ICT solutions to corporate, education and government clients. We combine engineering precision with consulting, integration, and commissioning to deliver reliable, scalable technology environments.

We deliver **AV Consulting | Design | Engineering | Integration | Commissioning | AMC** — supporting each system from initial requirements through installation, testing, handover, and lifecycle maintenance.

WWW.SECURETECHAV.COM

Core Philosophy

“ Vision

To define global standards in AV and smart building design — making spaces intuitive, sustainable and resilient.

”

Mission

- Deliver engineering excellence across every deliverable
- Connect AV consulting with engineering and integration
- Invest in R&D for scalable design standards

Expert Services

Acoustic Consulting

Precision sound isolation and spatial acoustic treatments for optimal clarity in any space.

AV System Architecture

Scalable, high-fidelity enterprise AV systems built on rigorous design principles.

IT & Network Integration

Converged digital infrastructure seamlessly bridging AV and enterprise IT networks.

Project Management

Site coordination, timeline governance, and rigorous contractor oversight at every stage.

Complete AV Consulting Services

Our structured 6-phase end-to-end delivery framework.

1

Needs Assessment & BOQ

Requirement gathering and budget estimation.

2

System Design & Schematic

CAD layouts and signal flow design.

3

RFP & Tender Management

Bid creation and vendor evaluation.

4

Project Management

Timeline, milestones and execution control.

5

QA / QC

Site inspections and standards compliance.

6

Testing & Commissioning

Calibration and official client handover.

Advanced Technology Solutions

Smart Meeting Rooms

- Zoom Rooms / Teams native
- Automated lighting controls
- Wireless presentation

Command & Control

- Zero-latency KVM over IP
- Redundant AV architecture
- 24/7 mission-critical ops

LED Video Walls

- Fine-pitch modular displays
- LED calibration & processing
- Dynamic content management

Immersive Auditoriums

- Line array acoustic modelling
- 4K high-lumen projection
- PTZ broadcast streaming

Industries Served

Corporate & IT

Enterprise agile workspaces

Higher Education

Smart lecture halls & campuses

Hospitality

BGM, ballrooms & venues

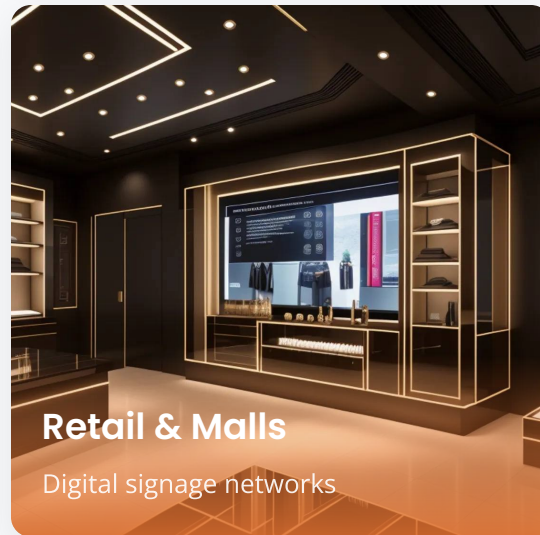

Government

Secure briefing command centres

Stadiums & Venues

Mass broadcasting & PA

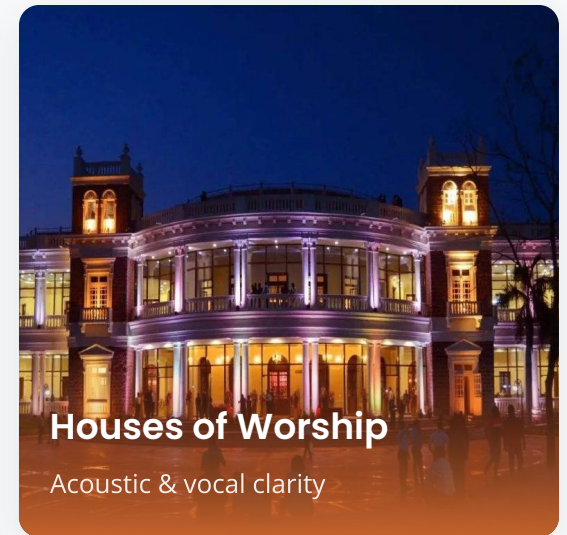

Retail & Malls

Digital signage networks

Public Infra

Transit hubs & PAVA safety

Houses of Worship

Acoustic & vocal clarity

Why SecureTech AV Designs?

Engineering Excellence

01

Documented, physics-based design that adheres to exact international standards on every project.

Application-Specific Engineering 02

Select and integrate technology around room requirements, system compatibility, reliable performance, and lifecycle support.

Innovation Focus

03

Continuous R&D ensuring our architectures accommodate future generational upgrades effortlessly.

Corporate Professionalism

04

Rigorous project management ensuring absolute adherence to scope, timelines, and budgets.

QA / Standards & Testing

Design Deliverables

- Comprehensive AutoCAD Schematics & Scaled Layouts
- End-to-end Signal Flow and Line Diagrams
- Highly detailed Bill of Quantities (BOQ)

Standards & Commissioning

- AVIXA standards compliant design methodologies
- Acoustical adherence to ISO noise ratings
- Multi-step QA checklists and documented sign-offs

Leadership & Credentials

Led by industry veterans carrying decadal expertise in AV consultancy and integration.

Principal Consultant

LEAD SYSTEM ARCHITECT

Overseeing enterprise-wide AV integration strategies and physical acoustic consulting across APAC.

Project Director

EXECUTION GOVERNANCE

Ensuring precise translation of AV schematics into carefully commissioned corporate infrastructure.

Technical Alliance Partners

OEM COLLABORATION

Maintaining certified expertise and direct avenues to top-tier control and display manufacturers globally.

Commercial Engagement Models

01. ADVISORY

Fixed Fee Consultancy

Strategic design roadmap, acoustic audits, and high-level architectural AV budgeting.

- Needs Assessment Report
- High-level Budget Setup

02. DESIGN & TENDERING

Time & Materials

Granular design creation, BOQ, RFP drafting, and vendor bid technical evaluation.

- AutoCAD Layouts
- Tender Documentation

03. PM & HANDOVER

Milestone Contract

Complete site supervision, periodic QA, and final system testing against defined KPIs.

- Site inspection reports
- Sign-off documentation

Trusted Excellence

Earning trust through relentless precision and uncompromised quality.

SecureTech's independent design drastically reduced our total cost of ownership by highlighting scalable network-centric AV alternatives we hadn't considered.

CTO, Leading IT Enterprise

The acoustic consulting and AV integration for our auditoriums was flawless. The project was delivered on time with impeccable oversight methodology.

Technology Capability Matrix

Rigorous, standards-based expertise across every AV discipline.

Category	Technologies & Expertise
 Audio	Line array PA systems · DSP processing (Dante AoIP) · Beamforming microphones · Acoustic treatment design
 Video	Fine-pitch LED walls · 4K/8K projection · Digital signage networks · Video matrix switching
 Control	Crestron · Extron · AMX automation · Touchpanel programming · Remote monitoring via cloud
 Collaboration	Microsoft Teams Rooms · Zoom Rooms · Hybrid learning systems · Wireless presentation
 Broadcast	PTZ cameras · RTMP/SRT streaming encoders · Multi-cam switching · IPTV distribution
 Network/IT	AV-over-IP (NDI, Dante, SVSI) · Managed AV switch configurations · Cybersecurity compliance

Integrated Solutions Portfolio

Corporate Meeting Rooms

Agile workspaces with seamless hybrid conferencing

Executive Boardrooms

Premium video walls & unified communication

Command & Control Centers

24/7 mission-critical video wall monitoring

Auditoriums & Theatres

Line array acoustics, projection & PTZ broadcast

Experience Centers

Immersive LED canvases and interactive brand spaces

Digital Signage Networks

Centrally managed CMS-driven display ecosystems

Hybrid Learning Classrooms

Unified A/V for in-person and remote pedagogy

Event & Broadcast Systems

Live production, streaming & IPTV infrastructure

PORTFOLIO HIGHLIGHTS

Installation Gallery

From single-screen boardrooms to 2,000-seat auditoriums — every installation reflects our engineering discipline and aesthetic precision.

Innovation & Emerging Technologies

We invest in R&D to bring next-generation AV capabilities — supporting system upgrades throughout the lifecycle.

AI-Powered Meeting Rooms

Auto-framing cameras, voice-activated controls and intelligent room booking integration.

Immersive LED Environments

Floor-to-ceiling curved LED canvases for experience centres and virtual production.

Spatial Audio Systems

Dolby Atmos-certified object audio, beamforming arrays and acoustic intelligence.

AV-over-IP Ecosystems

IPMX, NDI & AVB standards replacing legacy matrix systems for infinite scalability.

Smart Building Integration

AV unified with BMS, lighting, HVAC and access control via open API architectures.

Digital Twin Control Rooms

Virtual simulation for pre-deployment verification and remote diagnostics.

Compliance & Global Standards

Every project engineered to the strictest international frameworks — ensuring durability, safety and long-term performance.

AVIXA Standards

InfoComm-certified AV system design methodology

ISO Acoustic Compliance

ISO 3382 room acoustics · NRC 0.85+ rated panels

IEEE Network Standards

IEEE 802.1Q VLAN · 802.3bt PoE+ compliant AV networks

Dante / AES67 Audio Networking

Layer-3 routable audio over standard IP networks

HDCP Video Compliance

Full HDCP 2.2 content protection across all signal paths

Let's build the **future of work.**
